

GOVERNOR DEDICATES KIHEI CHARTER SCHOOL STEM ACADEMY

August 11 - Governor Lingle participated in the dedication of Kihei Charter School's new Science, Technology, Engineering and Math (STEM) Academy in the Maui Research & Technology Center.

The Governor toured the facility, where she met with students and faculty, and emphasized her administration's commitment to fostering critical thinking and problem solving skills in students.

STEM education is part of the Administration's Hawai'i Innovation Initiative to transform the state's economy from one overly dependent on land development to one based on the innovation capacity of its residents.
